The Safety Lab NZ

ELEVATING YOUR HEALTH AND SAFETY STANDARDS

Health and Safety at Work (General Risk and Workplace Management) Regulations 2016 mandate that organisations and Persons Conducting a Business or Undertaking (PCBUs) must protect workers and other persons from harm by requiring duty holders to eliminate or minimise risk. The cost of managing health & safety in the right way far outweighs the cost of managing it wrong.

At The Safety Lab NZ, we recognise the complexities that businesses face, navigating the dynamic and often challenging health and safety landscape. These complexities frequently impede their ability to ensure consistent, high standards of compliance. Limited time, capabilities and human resources, coupled with the absence of specialist advice often lead to a reliance on outdated practices. And good intentions resulting in people being harmed.

Unified Health and Safety Excellence

The Safety Lab NZ bridges the gap between health and safety knowledge and its application. We help you navigate your duties, ensuring protection for your business and people.

We provide tailored solutions to balance safety with uninterrupted operations.

Whether you're a commercial property manager or owner, H&S or HR leader, Facilities Manager or Managing Agent partnering with us ensures you meet and exceed your duties.

Contact The Safety Lab NZ today and partner with us to empower your business through tailor-made health and safety strategies designed for your specific needs.

Your Health & Safety Partner

Who is The Safety Lab NZ?

The Safety Lab NZ (an eteva group company), is a premier health and safety consultancy providing occupational health and safety, asbestos and hazardous materials assessment services to public and private-sector businesses, higher education and not-for-profits throughout New Zealand.

What problems do we solve for customers?

We understand the challenges businesses face in maintaining health and safety standards due to limited time, resources or the absence of in-house specialists. Our services alleviate these burdens, ensuring high standards in health and safety and occupational risk management.

What value do we add to our customers?

With over two decades of experience, The Safety Lab NZ offers expert advice, practical training, and comprehensive strategies. We work with organisational leaders and front-line staff to manage and reduce physical and psychosocial risks, ensuring the highest safety standards.

Why partner with us?

Partnering with The Safety Lab NZ guarantees compliance and elevated health and safety standards. We are your strategic ally, committed to understanding your operations and ensuring uninterrupted business continuity. Our core values of honesty, trust, and fortitude underpin all our services, making us the reliable partner for property managers, building owners, health and safety and HR leaders, facilities managers, and managing agents of medium to large organizations.
